

MICHAEL AHLOVELY STEVENSON

Full Stack Developer, Mobile App Developer, and Data Scientist

+62 815 1987 0235 | mxlovers77@gmail.com

LinkedIn: <https://www.linkedin.com/in/Michael-Ahlovely-Stevenson/>

Portfolio Website: <https://mxa-portfolio.vercel.app/>

A student of Computer Science from Binus University, Vice President of S-Class Bina Nusantara, and Founder of Myctix Archive. Experienced as an App and Web Developer who works with React.js, Flutter, Supabase, Azure DevOps, and many more. Currently learning Native Mobile Apps and Deep Learning to deepen my personal skills. A detail-oriented individual who is accustomed to completing Hackathon projects with a logical approach.

Work Experience

Bina Nusantara IT Division - Jakarta, Indonesia

Jan, 2026 - Present

Associate Programmer - Full Stack Developer

- Developed and maintained scalable enterprise Learning Management System (LMS) applications utilizing React and ASP.NET.
- Managed CI/CD deployment pipelines via Azure DevOps.
- Collaborated with cross-functional teams to design, build, and deliver high-quality software solutions.

Myctix Archive - Jakarta, Indonesia

Aug, 2025 - Present

Founder

An educational digital marketplace providing Notion-based learning resources and study guides.

- Developing and deploying company websites that comply with the accessibility standards, policies and procedures.
- Established and maintained S.O.P. and quality control guidelines for all company digital products.
- Create a successful marketing campaign that boosts the company website to more than 1600 edge requests during the initial launch period.

Project Experiences

Pantryon

Mobile App Project

- Designed and built a cloud-based mobile application to eliminate food waste by implementing automated inventory tracking and expiration alert mechanisms.
- Integrated barcode scanning capability and intelligent recipe recommendation features to streamline user food management.

OncoCare

Web App - Computer Vision - Data Science

- Developed a medical diagnosis support tool using Computer Vision and Deep Learning models for accurate breast cancer ultrasound image classification.
- Built an intuitive React interface for medical professionals to upload scans, interact with diagnostic predictions, and log patient data via Supabase.

Intervon

Web App - Natural Language Processing - Speech Recognition

- Built an AI-driven interview coaching platform delivering real-time, objective candidate performance evaluations.
- Integrated Whisper for speech-to-text transcription, Llama LLM for feedback analysis, and Pinecone vector database for contextual retrieval.
- Containerized the web application backend using Docker to ensure seamless deployment and environment consistency.

Heart Pulse

Mobile App - Machine Learning - Data Science

- Created a data-driven mobile application to calculate and project 10-year cardiovascular risk trajectories using predictive Machine Learning models.
- Built asynchronous RESTful API endpoints with FastAPI and established backend infrastructure on Supabase for scalable health record analytics.

Verilink

Web App - Machine Learning

- Engineered a proactive web security application that identifies malicious URLs and phishing threats using lexical feature analysis.
- Connected a high-performance ML classification pipeline to an interactive React frontend via FastAPI endpoints.

Cychael of Energy

Mobile App Project

- Produced a complete project proposal supported by a self edited demonstration video.
- Developed the mobile application using React Native while ensuring clean structure and maintainable component architecture.
- Integrated the application with a Gemini Flask 1.5 API, including request handling, data validation, and end to end feature implementation with Firebase.

Certificates and Certifications

Microsoft Certified: Azure Fundamentals (AI-900) - Jakarta, Indonesia

March, 2026

Issued by Microsoft

- Successfully passed the official Microsoft certification exam, demonstrating a comprehensive theoretical understanding of foundational Artificial Intelligence (AI) and Machine Learning (ML) concepts.
- Validated proficiency in identifying and describing core AI workloads, including Natural Language Processing (NLP), Computer Vision, anomaly detection, and conversational AI within the Microsoft Azure ecosystem.
- Mastered the guiding principles of Microsoft's Responsible AI, showing a strong grasp of ethical AI implementation regarding fairness, reliability, privacy, inclusivity, transparency, and accountability.

Dean's List BINUS University - Jakarta, Indonesia

December, 2025

Issued by Bina Nusantara University

- Awarded the Dean's List distinction in recognition of outstanding academic performance.
- Maintained a 3.97 GPA, consistently placing in the top academic percentile of the Computer Science program.
- Selected for the prestigious S-Class BINUS University based on academic excellence and later appointed as Vice President to lead organizational initiatives..

ICIMTech Conference Paper - Comparative Analysis of ResNet50, EfficientNet-B7, and DenseNet121 for Breast Cancer Ultrasound Image Classification - Jakarta, Indonesia

September, 2026

Issued by ICIMTech

- Authored and presented "Comparative Analysis of ResNet50, EfficientNet-B7, and DenseNet121 for Breast Cancer Ultrasound Image Classification" at the International Conference on Information Management and Technology.
- Conducted a comprehensive comparative analysis of deep learning models (ResNet50, EfficientNet-B7, DenseNet121) for accurate medical image classification.
- Published a comparative research study evaluating state-of-the-art Convolutional Neural Network (CNN) architectures for medical image classification.

Nvidia Fundamentals of Deep Learning - Jakarta, Indonesia

February, 2025

Issued by Nvidia

- Completed an on-site technical workshop focusing on deep learning fundamentals and architecture.

- Gained practical knowledge of convolutional networks (CNNs), Computer Vision, and recurrent networks (RNNs) for real-world applications.

Outstanding Performance on DSC Welcoming Party - Jakarta, Indonesia

October, 2026

Issued by PayLabs and Alibaba

- Awarded top recognition for exceptional operational management and leadership as Person in Charge (PIC) of Logistics during the annual DSC Welcoming Party 2025.
- Managed end-to-end logistical workflows, including inventory management, equipment procurement, venue setup, and food distribution for all attendees and staff.
- Coordinated cross-divisional communications with event, technical, and media teams to align timelines and eliminate operational bottlenecks.
- Resolved on-site technical and resource allocation issues proactively, ensuring zero major downtime and maintaining smooth execution throughout the event.

Organization Experiences

Data Science Club - Jakarta, Indonesia

Aug, 2024 - Present

- Served as an Activist in the Human Capital Department.
- Acted as PIC of Logistics for the DSC Welcoming Party, managing inventory, supplies, and coordination with other divisions.
- Acted as PIC of Event for the DSC Olympiad, leading event design, rundown creation, speaker outreach, form preparation, promotional content, and event hosting.
- Selected as a Candidate for the Human Capital Department Management Team Committee.

HIMTI Binus - Jakarta, Indonesia

Aug, 2024 - Present

- Served as an Activist of the Education Department.
- Actively teach more than 200 students every semester in preparation for their exams.
- Created comprehensive Notion-based exam notes and learning materials accessible to all students.

S-Class BINUS - Jakarta, Indonesia

Dec, 2024 - Present

- Selected into the prestigious S-Class, the School of Computer Science's flagship class.
- Appointed as Vice President, spearheaded major programs, including General Training and Gatherings, to foster engagement among high-achieving students.
- Developed applications within the Product Creation Division and represented the organization in prestigious national hackathons, notably Microsoft elevAlte 2024, Gemastik 2025, and PayLabs x Alibaba Mini Hackathon 2026.

Cyber Security Community - Jakarta, Indonesia

Aug, 2024 - Present

- Actively participated in CTF tournaments such as Crack the Shield and National Cyber Week.
- Studied cybersecurity fundamentals through both guided and independent learning.
- Collaborated with community members to explore and discuss cybersecurity related topics and practices.

Education Level

Bina Nusantara University - Jakarta, Indonesia

Jul, 2024 - Present

Bachelor Degree of Computer Science

- GPA: 3.97
- Currently on Sixth Semester

Skills

Technical skills: JavaScript, TypeScript, React, React Native, TailWindCSS, Pandas, PyTorch, Git, Github, and Azure DevOps

Soft skills: Problem Solving, Time Management, Teaching, Orientation to Detail, and Teamwork

Languages: Indonesian (Native), English (Fluent), Mandarin (Intermediate), Germany (Basic)
